# Overview

---

***InExplorer Classic*** is the simple but powerful file management utility for Windows Mobile®.

It implements all standard features such as file and folder manipulation. Thus, you can copy, move, rename or delete files, create folders, run programs with arguments, and search for files or folders.

# Installation

---

## Minimum Requirements

To ensure adequate performance, make sure that devices on which you install *InExplorer Classic* meet the following requirements.

- Microsoft® Windows Mobile® 5.0 for Pocket PC
- Microsoft® Windows Mobile® 6.0 Professional Edition
- Microsoft® Windows Mobile® 6.0 Classic Edition
- Microsoft® Windows Mobile® 6.1 Professional Edition
- Microsoft® Windows Mobile® 6.1 Classic Edition
- Microsoft® Windows Mobile® 6.5 Professional Edition
- Microsoft® Windows Mobile® 6.5 Classic Edition

InExplorer Classic cannot be installed or executed on the unsupported devices that described below.

- Devices shipped with all editions based on Microsoft® Windows® CE 1.0, 2.0, 3.0 and 4.0 .NET
- Devices shipped with Microsoft® Windows® CE 4.2 .NET including Pocket PC 2003 devices
- Devices shipped with Microsoft® Windows® CE 5.0 except Pocket PC Edition and Pocket PC Phone Edition
- Devices shipped with Microsoft® Windows® CE 6.0 except Professional Edition or Classic Edition
- Devices shipped with Microsoft® Windows® CE 6.1 except Professional Edition or Classic Edition
- Devices shipped with Microsoft® Windows® CE 6.5 except Professional Edition or Classic Edition
- Smart Phones shipped with all Microsoft® Smartphone Edition
- Devices shipped with non-Microsoft® Operating Systems: Palm® OS platforms, Symbian® OS platforms and Linux platforms

## Install InSuite Core Components

All *InSuite Classic* applications including *InExplorer Classic* work on the basis of *InSuite Core Components*. InSuite Core Components consist of core libraries and Microsoft® MFC 9.0 for Smart Devices. You have to install InSuite Core Components before installing InExplorer Classic.

## Installation with Executable File (.exe)

After downloading *InSuite Core Components* and *InExplorer Classic* Setup Executable Files<sup>1</sup>, just run them on *Windows®* based PC<sup>2</sup> to start installation process.

*Microsoft® ActiveSync® 4.5* or *Windows Mobile® Device Center* must be installed on your PC and your device has to be connected with PC for successful installation.

You can install InExplorer Classic into not only Main Memory but also External or Permanent Storages. But installing to External Storages like SD Cards is not recommended for the better performance. Permanent Storages are best recommendation.

## Installation with Setup Cabinet File (.cab)

*InSuite Core Components* and *InExplorer Classic* are provided as not only Setup Executable File but also Setup Cabinet Files<sup>3</sup>. You need to copy most suitable Cabinet Setup File to your device to install. Please refer to the manual of your device that maybe contained in the package to copy files to your device.

Just tap the Cabinet Setup File in *File Explorer* or your suitable file manager to install.

InSuite Core Components and InExplorer Classic should be installed on the same directory.

---

<sup>1</sup> Exe files.

<sup>2</sup> *Windows® XP*, *Windows® Vista* and *Windows® 7* are recommended.

<sup>3</sup> Cab files.

# Default Behaviors

---

## File Operations with Clipboard

You can copy or move files and folders with the clipboard commands like ***Cut***, ***Copy*** or ***Paste***.

To copy files or folders:

- Select files or folders which you want to manipulate.
- Tap and hold on the selected files or folders, then a popup menu will be appeared.
- Tap ***Copy*** on the popup menu.
- Go to the folder which you want to put your files in.
- Tap and hold on the folder, then a popup menu will be appeared.
- Tap ***Paste*** on the popup menu to start copying the selected files.

To move files or folders:

- Select files or folders which you want to manipulate.
- Tap and hold on the selected files or folders, then a popup menu will be appeared.
- Tap ***Cut*** on the popup menu.
- Go to the folder which you want to put your files in.
- Tap and hold on the folder, then a popup menu will be appeared.
- Tap ***Paste*** on the popup menu to start moving the selected files.

## Create a shortcut

To create a shortcut of the file or folders:

- Select a file or a folder which you want to manipulate.
- Tap and hold on the selected file or folder, then a popup menu will be appeared.
- Tap ***Cut*** or ***Copy*** on the popup menu.
- Go to the folder which you want to put your shortcut file in.
- Tap and hold on the folder, then a popup menu will be appeared.
- Tap ***Paste Shortcut*** on the popup menu to create shortcut file.

The original file will not be deleted even if you use ***Cut*** command.

## Copy files or folders to a folder

To copy files or folders to specified folder:

- Select files or folders which you want to manipulate.
- Tap and hold on the selected file or folder, then a popup menu will be appeared.
- Tap ***Copy To*** on the popup menu.
- Select the folder which you want to put your files in.

## Move files or folders to a folder

To move files or folders to specified folder:

- Select files or folders which you want to manipulate.
- Tap and hold on the selected file or folder, then a popup menu will be appeared.
- Tap ***Move To*** on the popup menu.
- Select the folder which you want to put your files in.

## Delete files or folders

To delete files or folders:

- Select files or folders which you want to manipulate.
- Tap and hold on the selected file or folder, then a popup menu will be appeared.
- Tap ***Delete*** on the popup menu.

## Rename files or folders

To rename files or folders:

- Tap lightly on the file or folder which you want to manipulate or tap and hold then tap ***Rename*** on the popup menu.
- Type the new name, then press ***Action*** button or tap outside of edit area to complete.

## Create a new folder

To create a new folder:

- Locate the folder in which you want to create a new folder.

- Tap and hold on the folder, then a popup menu will be appeared.
- Tap **New Folder** on the popup menu.
- Type the new name, then press **Action** button or tap outside of edit area to complete.

## Run a program with arguments

To run a program with argument, tap **Run** in the **Menu**.

## Send files to or receive files from Infrared

To send files to Infrared:

- Select files or folders which you want to send.
- Tap and hold on the selected file or folder, then a popup menu will be appeared.
- Tap **Send To** and **Infrared** on the popup menu.

To receive files from Infrared, tap **Receive** in the **Menu**.

## Search specified files and folders

To search specified files and folders, tap **Find** in the **Menu**. All found results will be displayed in **Found Items**.

### **Find**

In **Find** tab, you can set the basic preferences up.

- In **Find**, type the file name or file filter, such as **\*.\*<sup>4</sup>** which you want to find.
- In From, you can set the folder where the finding should start.
- Select the **Search Sub Folders** check box to search sub folders recursively.
- Tap **Find** button to start to find.
- Tap **Cancel** button to cancel all processes and return to main window.

---

<sup>4</sup> Wildcards like '\*' and '?' can be used.

## **Date**

In **Date** tab, you can set the date range of files to find for specifying.

To specify the date range of files to find for specifying:

- Fill **Filter by date from** check box if you want to apply the start date to search, and then select the date from calendar.
- Fill **Filter by date to** check box if you want to apply the end date to search, and then select the date from calendar.

## **Size**

In **Size** tab, you can set the size range of files to find for specifying.

To specify the size range of files to find for specifying:

- Fill **File size larger than** check box if you want to apply the minimum file size to search, and then enter the minimum size. The default value is **0** bytes.
- Fill **File size smaller than** check box if you want to apply the maximum file size to search, and then enter the maximum size. The default value is **1,073,741,824** bytes<sup>5</sup>.

## **Found Items**

All of found results are displayed and controlled in **Found Items**. You can locate an item in here directly.

## **About**

You can determine versions and build number of **InExplorer Classic**.

---

<sup>5</sup> 1,073,741,824 bytes are **1GB**.

# Customizing InExplorer Classic

---

## Control Modes

*InExplorer Classic* has three control modes: **Standard**, **Folders Only** and **Files Only**. To change control mode, tap **Mode** and its sub items in the **Menu**.

### **Standard**

Display both of **Folder Tree** and **File List**.

### **Folders Only**

Display **Folder Tree** only.

### **Files Only**

Display **File List** only.

## Layout Modes

You can switch between **Vertical Layout** and **Horizontal Layout**. To switch layout, tap **Horizontal Layout** or **Vertical Layout**<sup>6</sup> in the **Menu**.

## View Modes

**File View** has four view modes: **Large Icons**, **Small Icons**, **List** and **Details**. To change view mode, tap **View** and its sub items in the **Menu**.

---

<sup>6</sup> Layout menu item is changed according to current status automatically.

# Configuring InExplorer Classic

---

To configure *InExplorer Classic*, tap *Options* in the *Menu*.

## General

In *General* tab, you can customize the general features of *InExplorer Classic*.

### *Startup Folder*

*Startup Folder* can be specified to a folder which you want to be or the folder which is last opened when the previous instance exits.

### *Double Tap Activation*

Fill this check box if you prefer to *double tap* a list item to activate it rather than using a single tap.

## Components

In *Components* tab, you can customize the components and set them to be appeared and disappeared.

### *Vertical Layout*

Fill this check box to enable *vertical layout* mode, or clear to enable *horizontal layout* mode.

### *Show Folder Bar*

Fill this check box to show *Folder Bar*.

### *Show Status Bar*

Fill this check box to show *Status Bar*.

### *Full Row Selection*

Fill this check box to enable *full row selection*.

## Format

In **Format** tab, you can customize the formats to display the file information.

### *Use Simple Date Format*

Fill this check box to use **simple date format** to display date information, or clear to use **detail date format**.

### *Use Simple Time Format*

Fill this check box to use **simple time format** to display time information, or clear to use **detail time format**.

## Hide

In **Hide** tab, you can set the files to appear or disappear according to their types.

### *Hide System Files*

Fill this check box to hide the files which have **System** attribute. To change file attribute, tap and hold on the file, then tap **Properties** in the **Menu**.

### *Hide Hidden Files*

Fill this check box to hide the files which have **Hidden** attribute. To change file attribute, tap and hold on the file, then tap **Properties** in the **Menu**.

### *Hide ROM Files*

Fill this check box to hide the files which pre-installed into ROM.

### *Hide File Extensions*

Fill this check box to hide the extensions of the files.

## Features

In **Features** tab, you can customize the special features of **InExplorer Classic**.

### *Adjust Column Width Automatically*

Fill this check box to adjust column width of file list automatically. If the count of items exceeds 200 items, this feature will be disabled temporarily due to

performance issues.

### ***Use Name Editor***

Fill this check box to enable the special ***Name Editor*** instead of the system default editors.

### ***Multiple Selection Mode***

Fill this check box to enable ***Multiple Selection Mode***. Multiple Selection Mode is similar to ***Use check boxes to select items*** options of Folder Options of Windows Vista and Windows 7.

## **Find**

In ***Find*** tab, you can customize find options.

### ***Adjust Column Width Automatically***

Fill this check box to adjust column width of Found Items dialog automatically. If the count of items exceeds 200 items, this feature will be disabled temporarily due to performance issues.

## **ZIP**

In ***ZIP*** tab, you can customize the features of ZIP file operators.

### ***Compression Level***

ZIP compression level can be specified by this option. Available options are ***Best Compression***, ***Normal Compression***, ***Fast Compression*** and ***Store Only***.

### ***Code Page Options***

When compress files to ZIP, specified code page can be used as file and folder names.

# Registration

---

## About Registration

If you downloaded *InExplorer Classic* from *Infinite Revolution* web site, it will work for **15 days** only for chance that you are given to use InExplorer Classic for trial. And you have to purchase and register your copy of InExplorer Classic if you want to use this product consecutively after trial period.

Registration is the **confirmation** of your purchasing and the key of the **time limitation** of your copy.

To register your copy of InExplorer Classic, you will need your **E-Mail Address** which is used in purchasing process and the **Serial Number** that provided by *Infinite Revolution*.

## Retrieving Serial Number

Once you purchased *InExplorer Classic* correctly and successfully, the **serial number** of your copy will be sent to you with the **Purchase Confirmation Mail** within **48 hours** after purchasing.

If you have deleted or lost your Purchase Confirmation Mail, you can also retrieve the serial number of InExplorer Classic that you purchased through the **Serial Number Recovery** page in Infinite Revolution web site.

## Registration Process

If you retrieved your **Serial Number** that related to your **Mail Address**, you are ready to register.

To register your copy of InExplorer Classic, tap the **Register** button in **About** dialog and then the **Registration** window appears. If you filled the fields with the correct **E-Mail Address** and the **Serial Number**, tap **Register** button to complete the registration process.

When you have finished the registration process successfully, you may be noticed that your copy have been registered properly and the time limitation is removed. However, You can perform registration process again if you want to identify that the time limitation is removed properly.

## When You Failed Registration

Please retry with the proper registration information if you received the failure notice when your registration information is invalid.

You may have received invalid registration information due to the following reasons.

### *Your registration information is for the previous versions*

The serial numbers are different according to the versions. You have to upgrade your copy to register properly.

### *Your registration information is not published properly*

The serial numbers which are not published by **Infinite Revolution** cannot be applied to registration process. You have to ask that the resellers publish the proper serial number for your device again.

If you have purchased properly and installed the proper edition, please send an E-Mail to **Infinite Revolution** Support Team [support@infrev.com](mailto:support@infrev.com).

## Serial Number Recovery

If you have lost the serial numbers of **InExplorer Classic** you have previously purchased, please send E-Mail to **Infinite Revolution** Support Team [support@infrev.com](mailto:support@infrev.com) with following information.

- Registered E-Mail Address.
- Product Name and Version which you purchased.

The serial numbers will be sent to the e-mail address you have used to purchase these products not sender e-mail address.

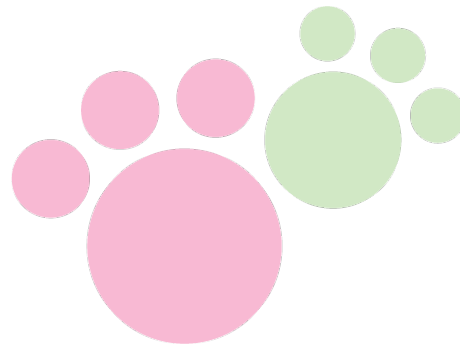

# Additional Information

---

## About Infinite Revolution

**Infinite Revolution** specializes in software development for **Microsoft® Windows® CE** including Pocket PC and Smartphone.

One of our main areas of activity is developing basic bundling solutions for Pocket PC. We have successfully implemented several Pocket PC and Smartphone projects.

We have developed **InLibrary**, a set of reusable components that allow significant reductions in development time, increase reliability and reduce risks in custom enterprise solution development and it is the core of **InSuite Classic**.

## Technical Support and Help

If you have any questions about our products, please contact **Support Team** through E-Mail [support@infrev.com](mailto:support@infrev.com).
